– Female facilities – 4 showers and 32 lockers

– Disabled Shower

### ENERGY EFFICIENCY

- New offices designed to achieve a certified BREEAM Non-Domestic Refurbishment and Fit-out 2014 rating of Very-Good

A new energy efficient LED lighting system is designed for the offices and associated cores on Level 5 & 6 and terrace area

- An intelligent lighting control system is also provided based on a DALI control system with local presence detection and daylight saving sensors
- Average 500 lux lighting levels to offices

Sub-metering for energy monitoring

### VENTILATION & AIR CONDITIONING

Heating and cooling is achieved via new ceiling void mounted four pipe fan coil units with new heating and cooling pipework and new fresh air supply and extract ventilation ductwork

- The system provides 12 litres per person based upon an occupational density of 1 person per 8 sqm

The office areas have been designed to Average Operative Conditions of 22°C +/- 2°C in Summer and Winter

- Air from the FCUs shall be supplied via perimeter slot diffusers and perforated faced outlet diffusers installed to match the ceiling tiles
- Return air is via the air handling style light fittings. The WC cores are subject to a minimum of eight air changes per hour
